

Redington Beach Town Hall, 105 164th Ave, Redington Beach, FL 33708

HOURS: Monday to Friday 8:00 am to 4:00 pm

[www.townofredingtonbeach.com](http://www.townofredingtonbeach.com)

Phone: 727-391-3875

Fax: 727-397-6911

## UPCOMING EVENTS

September 6:	Twin Towers Dedication Friendship Park 10:00 am
October 25 & 26:	Town Wide Garage Sales Start at 8:00 am
November 1:	Wine Fest LaContessa Condo 16326 Gulf Blvd 1:00 to 6:00 pm
December 14:	Gulf Communities Boat Parade Sunset

The Town of Redington Beach has a new day time deputy. He is Kevin McSweeney, Jr. He is originally from Boston, Massachusetts. Before moving to Florida in 2004, he was employed as a correctional officer for the State of Massachusetts. He worked for the St. Pete Police Department from 2004 to 2006 and the Pinellas County Schools from 2006 to 2007. He is now with the Pinellas County Sheriff's Office. He is married with three children, all boys, ages 10, 8, and 5.

## *Mayor's Message*

As summer winds down, a reminder that September and early October the tropics are still active for storm development. Please be mindful for your preparation and evacuation plans.

Now that school is in session be alert for school bus stops and walking and biking students.

Hope all our residents have a great Autumn.

Mayor Nick Simons

## ATTN BEACH RESIDENTS: DID YOU KNOW?

The Dept of Environmental Protection has a zero tolerance in regards to the following:

- You must stay 12' away from Sea Oates and Vegetation when using equipment or when beach masonizing.
- Eastward Raking behind the Sea Oates is prohibited!
- Digging or burying anything on the beach is prohibited!
- Removing Sea Oates or Vegetation of any kind is prohibited!
- You must obtain a permit from DEP prior to any disturbance on the beach!

The bureau of beaches and coastal systems manages all activities effecting Florida's beach and coastal systems and sovereign submerged lands. Any person refusing to comply with or willfully violating any rule or order prescribed by the department shall incur a fine for each offense in an amount up to \$10,000.00 to be fixed, imposed, and collected by the DEP. Each day during any portion of which such violation occurs constitutes a separate offense.

## Emergency Management By Mark Davis

Hurricane season does not end until NOVEMBER.

If you have special needs during a hurricane or storm, make sure you are signed up for the Special Needs Assistance Program. A copy of this form is on the back page of this newsletter.

During an event such as an official storm/hurricane warning, sand will be available across the street from Town Hall, at Friendship Park until supply runs out. At that time, the location will be relocated to Archibald Park, Madeira Beach, across from Subway Sandwiches. Sand Bags are available at Town Hall and are limited to 20 per house.

Evacuation Route: Redington Beach SOUTH on Gulf Blvd, Tom Stewart Causeway, Madeira Beach.

Where to Go: It is recommended you make plans to stay in a home of a friend or relative, a hotel, or motel.

If you must evacuate to a shelter, the closest shelter to Redington Beach is Bauder Elementary School, 12755 86th Avenue, Seminole. **NO PETS ARE ALLOWED.**

The closest shelter accepting pets is Oak Grove Middle School in Clearwater. Largo High is also a nearby shelter.

Find out where to take your pet now. Your veterinarian can advise you. A few shelters allow you to bring a pet, but there are restrictions. Service dogs are allowed in regular shelters and motels.

## Community Rating System

Elevation certificates are available and may be obtained at Pinellas Building Department (727) 464-3930.

A list of repetitive loss properties may be obtained at Town Hall, 105 164th Ave, 727-391-3875. Please contact Mark Davis, DPW/Code Enforcement. All of Redington Beach is designated a flood zone area.

### Irrigation Using County Water or Irrigation Using Wells/Lake/Ponds

#### Residential Lawn Watering Schedule

House Number Ending in	Water on
0 or 1	Monday
2 or 3	Tuesday
4 or 5	Wednesday
6 or 7	Thursday
8 or 9	Friday
Mixed or No Address	Friday

Morning Hours: 12:01 am to 10:00 am

Evening Hours: 4:00 pm to 11:50 pm

**Watering is prohibited between the hours of 8:00 am and 6:00 pm.**

## CODE ENFORCEMENT – ISSUES AND UPDATES

For Code Enforcement Questions, contact Mark Davis, Code Enforcement Officer and/or Terry Dillon, Assistant Code Enforcement Officer at Town Hall – 727-391-3875.

*From the desk of  
... Mark A. Davis  
DPW Director and Code  
Enforcement Officer*

### Several REMINDERS:

The Town of Redington Beach prohibits the parking of boats and/or boat trailers on any right of way or easement in the limits of the Town. It shall be unlawful for any person to place or park any recreational equipment upon any residentially zoned lot, piece or parcel of land in the town, or upon any right-of-way or easement within the residentially zoned areas of the town, except that one piece of recreational equipment for the sole purpose of loading, unloading, or repairing such recreational equipment, and the one piece of recreational equipment shall be allowed to remain in place upon such property only for a period of time as is reasonably necessary to actually load, unload, or repair such piece of recreational equipment; provided, however that the time for the loading, unloading, or repair of the recreational equipment shall not

in any event exceed four days, whether consecutive or not, within any 20 day time frame. For purposes of enforcement of this section, a day shall be determined by the appropriate authorities of the town to consist of either 24 consecutive hours or any fraction thereof. The mere moving of the piece of property during a day shall not reinitiate the computation of a 24 hour period.

**Off Street Parking:** The Town of Redington Beach adopted Ordinance 90-92 by referendum on September 4, 1990, which prohibits paving off street parking. In addition, the Federal Clean Water Act, Sec. 402, directs the EPA to establish regulations governing municipal storm water discharges to the waters of the United States. Further, the Town adopted Ordinance 93-07 on September 24, 1993, providing the Town with the legal authority to control pollution to the Town's MS4's (Storm Drainage System).

**What Does this Mean?** In simple terms this means that once a property owner removes any asphalt, concrete, or non pervious surface from any right of way areas, it must go back as a grassy area. Non pervious right of way surfaces are prohibited once these existing surfaces prior to September 4, 1990, have been removed, they cannot be rebuilt or replaced.

Once again, I would like to remind all Redington Beach property owners, Section 12-2 (8) of our ordinance that prohibits grass and weeds to exceed 12 inches in height. This years rainy season started very early. Lots of rainfall and warm humid temperatures create ideal conditions for your grass to grow very quickly. Unfortunately, it also creates an ideal environment for pests and rodents. Please make arrangements to keep your lawns from growing out of control. This month we will be targeting overgrown lawns once again, Town wide. Repeat offenders will not be issued a courtesy notice, but will receive a notice to appear, (citation). Please do your part to help keep your neighborhood clean, safe, and to keep property values up.

\*\*\*\*\*

Your Building Commissioner, David Drillick, has implemented the review of Chapter 6, Building Codes and along with the rest of the board are revising several ordinances. Watch for your next newsletter for updates of Chapter 6.

Visit our website for all the Town Ordinances:

**SANTA'S ANGELS NEWS**

Santa's Angels provided 341 children and their families with gifts and holiday meals for Christmas 2007. Volunteer shoppers were given \$50.00 to purchase gifts for each child. Santa's Angels negotiated with local vendors to obtain food that was distributed to the families along with the gifts. The money for the gifts and food came from fundraisers and several generous donors. There has already been a "Cinco De Mayo" fundraiser and several more are scheduled: A "Jackson Pollock Painting Party" and "An Evening in Palermo" dinner are in the planning stages.

We are doing the Haunted House again this year. RMC Property Management has generously donated a huge space to us in the middle of Seminole Mall. We start building Sept. 1. It will be open for haunting Fridays and Saturdays, Oct. 17, 18, 24, 25 and Halloween Night, the 31st. Haunting and building volunteers welcome.

On Sunday evening, Nov 9, we will be partnering with Stein Mart in the Seminole Mall to present a private shopping experience. The store will be closed to the public. There will be fashion presentations with local celebrities modeling items from participating vendors. Light appetizers will be served, compliments of local restaurants. A great opportunity for some early, leisurely Christmas shopping. Admission \$10.00.

In early December we will be hosting "Breakfast with Santa" at Telly's Restaurant in the Seminole Mall. This is an opportunity for children to meet Santa and tell him their Christmas list in person. The Rotary Club helped us with the event last year. Admission is \$5.00.

We welcome all volunteers. We also work with the Bright Futures Community Scholarship organization to provide hours for participating students. Please contact Lynne Hawthorne 319-8092 or Kathryn Cormier, 394-1494 for more information, to volunteer, or to purchase tickets.

**NPDES NATIONAL POLLUTION DISCHARGE ELIMINATION SYSTEM**

Due to Federal regulations, swales have been installed throughout the Town of Redington Beach. Since we discharge storm waters directly into a federal body of water, (Boca Ciega Bay) the Town is required to implement best management practices in regards to reducing surface contaminates and pollution to our drinking water supply in general. Please familiarize yourself with the attached information on swales. Remember, our efforts to reduce pollution today, affects the world in which our children will live tomorrow.

Each quarterly newsletter you receive has helpful hints and educational information that I feel will help keep you as residents, of our unique community well informed and up to date with the ever changing federal laws and regulations that we as a municipality are required to comply with. I hope everyone will take a few moments of your time to familiarize yourselves with these helpful facts.

Thank you, Mark A. Davis, D.P.W. Code Enforcement

**NPDES: NATIONAL POLLUTION DISCHARGE ELIMINATION SYSTEM**

The Town is required yearly to obtain a permit from the State of Florida to further its efforts to reduce the amount of pollutants entering the public waterways and endangering the environment. To work toward that goal the Town is requesting your help in the following ways:

Please don't dump or throw anything (including concrete, grass clippings, etc.) into the gutters, swales on Intracoastal Waterway. These areas must be free of debris to function as they have been designed.

It is especially important that no one disposes of or dumps or causes the disposal of any hazardous waste within the municipal limits of the town. Hazardous waste is defined as any solid waste, or combination of solid wastes, which because of its quality, concentration, or physical, chemical or infectious characteristics may cause or significantly contribute to an increase in mortality or an increase in serious irreversible or incapacitating reversible illness or pose a substantial present or potential hazard to human health or the environment when improperly transported, disposed of, stored, treated or otherwise managed. These materials can be disposed of in conjunction with established amnesty days of the county and the state, and at properly authorized locations or sites.

If you observe any illegal disposition of materials into drainage facilities that could obstruct the flow of Stormwater or if you see dumping of hazardous waste or debris in gutters, manholes, swales or the Intracoastal Waterway, please notify the Public Works Department at 727-391-3875.

Also, if you are contemplating construction, please check with the P.C. Building Department before you build onto, alter, regrade or fill your property. A permit may be needed to ensure projects do not cause drainage problems on other properties, increase chemical pollutants, (pesticides, fertilizers, etc.) entering the waterways.

Find plants and gardening methods that require fewer fertilizers, herbicides, and pesticides for your landscaping plan in order to reduce the possibility of chemicals polluting the bay.

NPDES NATIONAL POLLUTION DISCHARGE ELIMINATION SYSTEM

**Florida's Threatened Water:**

Water is everywhere in Florida! With more than 8,400 miles of tidal shoreline, 8,000 lakes, 20 major rivers and estuaries, and the largest underground aquifer in the United States, Florida has an abundance of water resources. In addition, Florida receives approximately 50 to 65 inches of rainfall from about 120 storms in an average year.

The residents and visitors of Florida depend upon these water resources for agriculture, industry, and a variety of recreational activities such as fishing, boating, and swimming. Most importantly, we depend upon it for our drinking water. More than 90% of the state's drinking water is drawn from underground aquifers. With these abundant resources, it would seem that there is an unlimited supply of usable water. However, this is NOT true. Our water supply, arguably Florida's most valuable resource, is threatened.

Today, the leading threat to Florida's water resources and quality of this resource is non-point source (NPS) pollution, often referred to as pointless personal pollution. Pointless personal pollution does not originate from a single, specific source but is generated by a variety of activities spread over a broad area.

Everyone contributes to pointless personal pollution in many different ways. Driving an automobile, maintaining a flower garden, mowing the grass, or walking a dog are just a few of the activities that can contribute to NPS or personal pollution. Every time it rains, pollutants such as soil particles, pesticides, fertilizers, oil, grass clippings, and waste are released into our waterways from plowed fields, streets, rooftops, and neighborhood yards.

**These items are Pollutants? You Bet!**

\* Soil particles or sediments and other organic materials such as leaves and grass clippings can reduce water depth, smother aquatic organisms and reduce photosynthesis, which in turn decreases the amount of oxygen in the water. It basically destroys aquatic habitat.

\* Chemical nutrients in fertilizers, detergents, and sewage cause excessive plant growth and algae blooms. Overgrowth of aquatic plants and algae can clog navigational waterways, impair recreational activities, block sunlight from penetrating the water column, and reduce dissolved oxygen levels resulting in fish kills. High nutrient levels in groundwater can also be a principal cause for closing potable wells and for methemoglobinemia (blue baby syndrome).

(Pollutants Continued)

\* Bacteria, waterborne viruses, and pathogens from septic systems, livestock, and pets cause illnesses such as cryptosporidiosis than can result in the closure of swimming areas and shellfish beds.

\* Toxins, including heavy metals, pesticides, and organic chemicals from farms, lawns, city streets, driveways, and landfills can pose serious human health risks when they contaminate fish, shellfish, and drinking water wells.

The threat of non-point source pollution is real. Everyday, thousands of pounds and millions of gallons of non-point source pollutants are entering and deteriorating our water resources in Florida and throughout the United States. It has been reported that:

- Each year, over 132 million gallons of used motor oil are poured down storm drains or disposed of in landfills nationwide.
- Approximately 1,000 pounds of lead, zinc, cadmium, and other toxic metals from streets and parking lots are introduced into receiving waters from a single rainstorm.
- More than 70 million pounds of pesticides are used on lawns and golf courses annually.
- Approximately 80 million septic systems in the United States discharge 8 billion gallons of wastewater annually into soil and groundwater.

Unfortunately, most people do not understand the threat of non-point pollution to our water resources. They do not realize that everyday activities such as over fertilizing the lawn and applying fertilizer minutes before a rainstorm can contribute to water pollution. Many people do not believe that the preventive actions can really make a difference, but they can. This is why implementing an effective education program on pointless personal pollution is so important. Once everyone realizes how they contribute to the problem and that they can be part of the solution, the threat of non-point source pollution will decline.

**Code Enforcement Mission Statement**

To ensure a safe, healthful environment consistent with community needs and Town codes while striving for voluntary compliance and public awareness.

NPDES CONTNUED **Stormwater Management**

**Only Rain in the Drain:** If you follow this motto, you're well on your way toward successful stormwater management. Your goal should be to prevent oil, grease, antifreeze, and any other material from mixing with stormwater. Here's How:

1. **Prevent Spills & Leaks.** Visually inspect vehicles entering the facility for leaks. If you see a leak, contain it with a drip pan or absorbent material, (such as dry sweep or kitty litter) and clean up the residue from the ground. When removing vehicle fluids, always use a drain pan, drain tables, or pump or suction system to capture the fluids.
2. **Clean up Spills Immediately.** When spills and leaks happen, clean up as much of the fluid as you can, as quickly as possible. For small spills use shop rags, oil dry, or absorbent materials. For larger spills use absorbent socks, pads, and pillows. Spill kits that include absorbent materials like oil dry and/or absorbent pads, socks, and pillows should be placed conveniently around the shop, and you should know where the kits are at all times. Keep brooms, shovels, or scoops near your spill kit. Place used absorbents in a designated container for proper disposal. Check with your manager before putting used absorbent in a dumpster.
3. **Handle Fluids Properly.** After you remove vehicle fluids, store the fluids in clearly marked containers. These containers should have some type of secondary containment, (such as a larger drum or a concrete curb) to prevent a large spill from spreading. Make sure not to mix oils with antifreeze or solvents that can create a hazardous waste, which can't be recycled and is expensive to get rid of. Also make sure to use the right size funnels when pouring fluids into a storage drum. Check the drums regularly for leaks.
4. **Drain, Cover, and Contain All Oil Parts Stored Outside.** If you store oily parts outside or in vehicles that are outside, ensure they are covered to prevent contact with rain or snow. Inspect these areas regularly for spill and leaks.

Stick to these Practices! It is important to always implement these practices, and to pay special attention to these issues during wet weather. Be proud of the work you do to protect the environment. What you do in the yard matters to your business and to your community. You can Make a Difference!

NOTE: Dumping or pouring anything into storm drains other than rainwater is prohibited by Federal, State, and Local laws. As of recently, swimming pool water can no longer be drained into a curb/gutter or into a catch basin leading into a storm drain with out first being de-chlorinated. Please report any violations to 727-391-3875

**Fertilizer Facts:**

Fertilizer is not plant food. Food for plants comes from the sugars the plant makes through photosynthesis. Fertilizer nutrients are used in this process, but a lawn or plant growing poorly in too much shade will not grow better if fertilized.

The truth about "100 percent organic" is that it often refers only to the nitrogen in the bag. Furthermore, the nitrogen can be derived from natural products, such as manure, or it can be from synthetic chemicals, such as urea. Read the label to determine where the "organic" nitrogen is coming from.

Make fertilizer selections based on need. Many fertilizers contain a number of plant nutrients, even though only one or two may be needed. What plant response do you want? Greener growth? More flowers or fruits? Decide which nutrients will give you what you want and then buy only those.

When fertilizer nutrients are in "slow-release" forms, they are available to plants over a longer period of time and less nutrients are wasted or lost as pollutants. Look for these terms on the product or fertilizer bag:

- A. Time released, slow-release, or controlled release
- B. Water insoluble nitrogen, activated sludge, sulfur-coated urea(SCCU), Isobutylidendiurea (IBDU), Ureaform (UF), Nitroform, or polymer, plastic or resin-coated urea.

Remember to fertilize only when needed to maintain the health of lawns and plants. Do not exceed the rate of 1 pound of nitrogen per 1,000 square feet per application.

As an ongoing program to keep our Town pollution free and to comply with Florida Dept. of Environmental Protection regulations the Town of Redington Beach offers the Adopt a Street Program.

**If you would like to Adopt-A-Street, contact Town Hall. The Town will supply you with trash bags and gloves and will remove trash filled bags from a designated pick up area. Drop off the completed registration form and give us a call when you're ready.**

## PUBLIC WORKS:

by Mark Davis, DPW/Code Enforcement

**STORM WATER PROJECT UPDATE:** Currently Phase III is approximately 60% completed and going very well. Keystone excavators, Inc has gone the extra mile for our residents trying to make the construction work as painless as possible. The east portion of Phase III has been completed with new sod and asphalt in place. They are now proceeding to the south end of this phase with anticipated completion of Phase III by November 1st of this year.

**Gulf Blvd Construction:** As you are probably already aware, there is ongoing work taking place on Gulf Blvd, the entire one mile stretch and some minor areas on the backstreets. New handicap ramps on the sidewalks have been replaced to conform with the new ADA requirements. Leaking joints in DOT's drainage pipes are causing roads to fail, creating sinkholes in the boulevard, sidewalks, and potentially private properties such as driveways. Florida's Department of Transportation has contracted with R.E. Purcell Construction to correct these problems. According to project superintendent, Jake Gaines, Purcell is in the process of removing silt and barnacles from the insides of the storm water drainage pipes and grouting and sleeving the failing joints.

The traffic light at 161st and Gulf Blvd will also be replaced with a new signal attached to a strain pole. There will no longer be signals suspended from wires. They will be attached to a 22' high pole and a 70' arm stretching across the boulevard. Gulf Blvd will be milled, repaved, and restriped as a final portion of this project. The completion date is October 30th of this year.

**FYI:** The Florida Department of Environmental Protection will be visiting our Town in about one month. They will be driving and walking through our neighborhoods making sure the Town and its residents are complying with NPDES requirements such as erosion control devices at properties under construction. As I have informed everyone in previous newsletters; how important it is to comply with these requirements. Not only are illicit discharges and sediment/erosion control Town ordinances, they are also Federal Law. I would like to thank everyone for their co-operation.

**Basic Services:**

Police: Pinellas County Sheriff  
 Non Emergency.....727-582-6200

Fire: Non Emergency..... 727-391-3400

Police & Fire EMERGENCY ONLY: 911

Electric: Progress Energy .....727-443-2641
